Heading: "Sprint 4 Report", Geocaching Social Media, CacheMe, 06/07/2023

- **Actions to stop doing:** Not having a code standard.

- **Actions to start doing:** Organizing and commenting our code. Change the database as we move forward. Use centralized stylesheet

- **Actions to keep doing:** Keeping great communication.

- **Work completed/not completed:**
  Completed:

1) Add a field for an array of users that liked the post in the post model
2) Update the post's likes array in database on click
3) Check the array and display if post was liked by the current user
4) Design and create a profile UI
5) Make an array that stores user's posts
6) Display a feed of user's posts on profile page
7) When users sign up, have them add a profile picture.
8) Add new user's profile pictures to the firebase storage and database.
9) Update profile pictures everywhere: Add profile picture to feed and post page
10) Implement the functionality of the current user's profile page.
11) Add a "Add friend" button on other peoples pages
12) Create an array of the current user's friend ids in the user model (database).
13) When users add friends, update firebase.
14) Implement functionality of viewing a profile that is not the current user's.

   Not completed:
1) Creating a feed of the posts of the friends you are following.

- **Work completion rate:**
  Total number of user stories completed: 3
  Total number of days during the sprint: 14 days
  Total number of estimated ideal work hours completed: 26 hours
  Actual hours of work completed: 26 hours
  User Stories Per Day: ~.2 user stories
  Ideal Working Hours Per day: 1 hour per day

Hours spent on Project Collectively

Legend: Predicted Needed Time — Hours Spent Total — Tasks completed
